

Philanthropic Goals

Namasté, we honor the place in you in which the entire Universe dwells, we honor the place in you which is of Love, of Integrity, of Wisdom and of Peace. When you are in that place in you, and we are in that place in us, we are One.

Businesses do not thrive in a vacuum. We all have duty greater than ourselves to help alleviate the many ills that permeate societies across the globe even to this day as we are part of the fabric of these societies. Towards this end, we support several charities that meet our selection criteria in many different fields that work locally and internationally to help people, animals, and this little blue planet we all call home.

As a not-for-profit, our goal is to distribute net proceeds generated by our activities to support worthy causes, set up scholarships for deserving students as well as fund other charitable initiatives of our own undertaking. The money for these efforts may come from membership dues, event attendance dues, and targeted fundraisers.

"No man is an island, entire of itself; every man is a piece of the continent, a part of the main... any man's death diminishes me, because I am involved in mankind." - Meditation XVII by John Donne.

Business Goals

We believe your business can never be too successful. Whether big or small, the key to effective management, sustained growth, and healthy profit margins is having the right resources at your fingertips and making the right connections. That's what the Indian Chamber is all about. We will help you find industry facts, consumer trends, and other valuable business intelligence, as well as connect you with prospects and partners through our networking events, business seminars, speaker series and website.

We also serve as a resource for businesses, independent entrepreneurs, not-for-profit charity organizations, and individuals here and abroad. Located in the heart of New York City, the business, financial and cultural capital of the world, we will offer access assistance to extensive and specialized business resources as well as personalized business research and reference.

Our goal is to support all business categories and economic development by meeting the information needs of the business community, promoting relevant events, and providing employment information and career exploration opportunities for student members. We sponsor networking and training events while working in partnership with businesses and organizations across the spectrum to provide greater public access to information and services that is timely and helpful to the enhancement of business and enrichment of Indian and mainstream culture. We are supported by the efforts of our members, professionals, and others who share in the goal of furthering the interest, rights and culture of Asian Indians here and abroad.
